

# THE G FORCE

Words and music by John Hinton

People used to assume that things just liked to be low,  
That the apple fell to the ground because that's  
Just where it wanted to go,  
And the moon and the sun stayed in the sky  
because God decreed it so.

G C  
Am Dm G C  
F G C

Then a saviour came along,  
And he showed that that was wrong.  
It was Newton, I said Issac Newton,  
Who saw a far off falling fruit and  
"Of course!", he said, "It's a force!", he said,  
"And it's the same force that's making the moon spin round  
And making the apple fall down."

He said, "Gravity  
Keeps the Galaxy  
Working in harmony  
For you and me."  
Sing it with me now... *(repeat chorus)*

G C

Newton, I said Issac Newton,  
Saw a far off falling fruit and  
He caused a wild worldwide sensation  
By expressing his theory in a simple equation:  
Force equals mass times acceleration.

G G7

G F G C

And that is why  
Gravity  
Keeps the Galaxy  
Working in harmony  
For you and me.  
Sing it with me now... *(repeat chorus)*
